---

ASM (Assembler), C, C++, C#, HTML, PHP, Java, SQL, VB.Net

Microsoft Access, Excel, PowerPoint, Outlook, Word, Visual Studio  
Windows Server, XP

Versions control systems (IBM Rational ClearQuest and ClearCase, SVN, CVS, SourceSafe)

## Some words about myself

---

At the age of 12, I started programming with the languages batch and QBasic. Since that time I constantly improve my programming knowledge and I always keep up to date with the latests trends and new developments.

Since 2004 I have been working as a self-employed software developer and consultant alongside my studies to give me a great insight into many software projects and different companies.
